SUMMARY

Focused on applying problem-solving abilities and technical strengths to deliver effective solutions, supported by proven internship experience and academic projects.

SKILLS

Programming Language : Python
Web Development: HTML, CSS, JavaScript
Database & Frameworks: SQL, MySQL, Flask, Django
Tools & Platforms: GitHub, Visual Studio Code, Postman, Render

EDUCATION

Bachelor of Technology (B.TECH) - COMPUTER SCIENCE AND ENGINEERING	2023 – 2027
Manakular Vinayagar Institute of Technology, Puducherry	CGPA: 8.73/10
Higher Secondary (HSC)	
SRVS National Higher Secondary School , Karaikal , Pondicherry	2023 81%
Secondary School (SSLC)	
SRVS National Higher Secondary School , Karaikal , Pondicherry	2021 80%

PROJECTS

README Auto-Generator Tool

- Built a Python tool that auto-generates structured README files from user input, cutting manual documentation time by an estimated [50-70]%
- Applied AI-driven text-structuring logic to convert unstructured input into formatted markdown output
- Automated repetitive documentation tasks using Python

Visitor Room Counter System

- Designed and built a real-time visitor counting system using Arduino + IR sensors, achieving an estimated 90%+ detection accuracy in testing
- Integrated an LCD display for live count updates and a buzzer alert triggered at a 20-person capacity limit
- Reduced manual headcount tracking effort for a room with a capacity of 20–25 people

EXPERIENCE

Python Programming Intern (Virtual) - CODSOFT:	(10 Sep 2025 – 10 Oct 2025)
- Developed 3 Python projects, including a Number Guessing Game and Student Grade Calculator, over a 1-month period - Implemented core Python concepts (loops, functions, conditionals) to solve 10+ practical coding problem - Completed approximately 30 hours of hands-on coding, debugging, and independent project implementation	
Web Development Intern (Virtual) – InternPe:	(6 Jan 2026 – 6 Feb 2026)
- Designed and coded 2–3 responsive web pages using HTML and CSS, focusing on clean layout and cross-browser compatibility - Deployed project pages live using Render, gaining hands-on experience with the full development-to deployment workflow - Strengthened practical skills in HTML, CSS, and Git-based version control through real project tasks	

CERTIFICATIONS

- HTML5 Application Development — Completed training in HTML5, semantic markup, forms, and multimedia [Issued [08/2026]
- Naukri Campus – Young Turks 2025** — Scored 99.86 percentile in India's largest skill contest, recognized by leading industry experts (Certificate ID verified)
- IBM – Getting Started with AI** — Gained exposure to AI fundamentals, basic machine learning concepts, and real-world applications
- HackerRank – Python (Basic) Skill Certification** — Certified proficiency in Python fundamentals and core programming concepts
