SUMMARY

Focused on applying problem-solving abilities and technical strengths to deliver effective solutions, supported by proven internship experience and academic projects.

SKILLS

Programming Languages : Python, Java
Web Development: HTML, CSS, JavaScript
Database & Frameworks: SQL, MySQL, Flask, Django
Tools & Platforms: GitHub, Visual Studio Code, Postman, Render

EDUCATION

Bachelor of Technology (B.TECH) - COMPUTER SCIENCE AND ENGINEERING	2023 – 2027
Manakular Vinayagar Institute of Technology, Puducherry	CGPA: 8.9/10
Higher Secondary (HSC)	
SRVS National Higher Secondary School , Karaikal , Pondicherry	2023 81%
Secondary School (SSLC)	
SRVS National Higher Secondary School , Karaikal , Pondicherry	2021 80%

PROJECTS

OsteoInsight — Explainable Bone Health Assessment

Python | Streamlit | Random Forest | SHAP | Machine Learning

- Developed a machine learning application using Random Forest classification to assess bone-health risk across Low, Medium, and High risk levels.
- Built an interactive Streamlit interface with SHAP-based explainability and visualizations to make model predictions easier to understand.
- Implemented personalized recommendations and PDF report generation to present prediction results in a structured format.

ProjectPulse — Real-Time Client Project Dashboard

React | TypeScript | Express.js | PostgreSQL | Prisma | Socket.IO

- Developed a real-time project management dashboard using React and TypeScript to monitor projects, tasks, progress, and status.
- Built REST APIs with Express.js and Prisma for PostgreSQL-based project and task management.
- Implemented Socket.IO for real-time updates and responsive dashboard interfaces for live project tracking.
- OsteoInsight — Explainable Bone Health Assessment

EXPERIENCE

Python Programming Intern (Virtual) — CODSOFT (10 Sep 2025 – 10 Oct2025)

- Developed 3 Python projects, including a Number Guessing Game and Student Grade Calculator.
- Applied core Python concepts to solve practical coding problems.
- Gained hands-on experience in coding, debugging, and project implementation.

Web Development Intern (Virtual) – InternPe: (6 Jan 2026 – 6 Feb 2026)

- Designed and coded 2–3 responsive web pages using HTML and CSS, focusing on clean layout and cross-browser compatibility
- Deployed project pages live using Render, gaining hands-on experience with the full development-to-deployment workflow
- Strengthened practical skills in HTML, CSS, and Git-based version control through real project tasks

CERTIFICATIONS

- HTML5 Application Development** — Completed training in HTML5, semantic markup, forms, and multimedia [Issued [08/2026]
- AWS Academy Graduate** – Cloud Foundations | AWS Academy | Jan 24, 2026 Completed 20 hours of foundational training in AWS Cloud and core cloud concepts.
- IBM – Getting Started with AI** — Gained exposure to AI fundamentals, basic machine learning concepts, and real-world applications
